iZinti Zama

wood burning stove | 265mm x 265mm x 280mm | 2.09kg

The Rocket Works iZinti Zama wood stove is a highly efficient cooking stove, designed to withstand years of regular use.

This small, yet highly effective stove can boil 5 liters of water in 15 minutes using as little as 250g of wood and be used for everyday cooking. The Zama Zama provides you with a fast, safe and convenient way to cook while simultaneously protecting your health and the environment.

Made from high quality, heat resistant stainless steel, the outer cage remains cool to the touch even after hours of cooking. Its thermal emissions are the best in its class.

Mac Shell Stove

**Macadamia shell /pellet burning stove
265mm x 265mm x 280mm | 2.5kg**

The Rocket Works Mac Shell Stove is the perfect environmentally friendly stove for you.

Once lit this gasifier stove burns clean and smokeless. One load of the Macadamia nut shells (1.3kg) burns up to 2 hours. The use of the shells creates a value chain for a product that used to be discarded as waste and also aids in reducing deforestation. The end resulting charcoal is brilliant biochar for your garden compost.

Other biomass fuels can be used in this gasifier stove like pellets from agricultural residues that can be used as fuel in the communities that live close to where the biomass is produced.

The Mac Stove includes the potjie stand as standard.

Cha Zama

Charcoal burning stove | 265mm x 265mm x 280mm | 2.5kg

The Rocket Works Cha Zama charcoal stove was added to the product line to meet the demand for charcoal stoves in African countries.

The charcoal stove incorporates design characteristics from the Zama Zama wood stove and modifies them to apply to the type of heat charcoal produces. Charcoal heat is by its nature a radiant heat, for this reason the fire chamber is wider and located closer to the cooking surface.

In test reports the Cha Zama uses up to 67% less fuel than the Mozambican Specific Fuel Consumption Baseline (01.2015) applying the Global Alliance Water Boiling Testing protocol (4.2.3).

Jumbo Zama

wood burning stove | 340mm x 260mm x 410mm | 3.6kg

accommodate large cooking pots of up to 100lt when used with a solid cooking stand or the Maxi Zama stand. This makes it the perfect environmentally friendly stove for communal and institutional cooking.

Based on the same efficiencies as its smaller counterpart, the iZinti Zama, the Jumbo Zama uses minimal fuel and provides a clean cooking solution on a larger scale. Smaller pots can be used on the Jumbo Zama as is or with the use of the Potjie Stand.

The Jumbo Zama is made from high quality, heat resistant stainless steel, with an outer cage that remains cool to the touch even after hours of use.

Maxi Zama

Jumbo Zama ad-on

772mm x 380mm x 560mm | 5kg

The Rocket Works Maxi Zama is a stainless steel pot stand for communal and institutional cooking on the Jumbo Zama.

This cleverly designed stand can hold pots of up to 100lt in volume, and keeps the vessel safely in place when cooking large quantities of food, thus adding to the safety of the Jumbo Zama stove by preventing harmful burns sustained in crowded cooking environments. The Maxi Zama is easy to assemble and can be unassembled and transported easily with the Jumbo Zama.

The price of the Maxi Zama includes the Jumbo Zama stove.

Victory

Fan stove | 370mm x 270mm | 2.9kg

New tier 5 fan stove, developed specifically for manicured fuel (i.e either A-grade pellet or the macadamia shell)

This stove burns cleanly on both these types of fuel.

New Product

Super Rocket

Fan stove | 300mm x 275mm | 3.42kg

New tier 5 fan stove, developed specifically for manicured fuel (i.e either A-grade pellet or macadamia shell)

This stove burns cleanly on both these types of fuel.

This model stove uses the same fuel as the Victory Stove, but has the added feature of being able to connect to the internet in order to track use.

New Product

Accessories

Pot Skirts

The Rocket Works Pot Skirt has been designed for use on **all of our stoves**, this protective shield is primarily used in windy conditions to help retain heat when cooking outdoors. It protects the flame and distributes heat evenly along the bottom and the sides of the pot which saves on fuel and cooking time.

* Cooking pot not included

Potjie Stand

The Rocket Works Potjie Stand has been designed to fit all of the Rocket Works stoves. The stainless steel pot stand supports the three legged potjie pots up to size 3 and flat pots and kettles.

The Potjie Stand is part of the Mac Shell Stove only, for use on the other stoves, Potjie Stand will need to be purchased as an accessory to stove.
